

Clean Energy Opens Renewable Natural Gas Station in Philadelphia - South Jersey Area to Serve Fleets

June 25, 2024

Carney's Point Station to Provide Clean, Lower-carbon RNG and is Part of Growing National Fueling Network for Heavy-Duty Fleets

CARNEY'S POINT, N.J.--(BUSINESS WIRE)--Jun. 25, 2024-- Clean Energy Fuels Corp. (NASDAQ: [CLNE](#)) announced the opening of a new [renewable natural gas](#) (RNG) station in Carney's Point, New Jersey for heavy-duty trucks and other fleet vehicles to access a fuel produced from organic waste and is rated the cleanest available.

The new station is strategically located in the important trucking corridor between Philadelphia and Wilmington, DE near Interstate 295 and the New Jersey Turnpike and is now part of Clean Energy's

fueling network of over 600 stations in North America.

"The Carney's Point station gives fleets that operate in the Philadelphia and South Jersey area access to a much cleaner alternative fuel," said Chad Lindholm, Senior Vice President at Clean Energy. "One of the benefits of RNG is that it's available in significant quantities today and is already helping to decarbonize the heavy-duty vehicle market. We are pleased to provide truck fleets a convenient location in this important corridor with an ultra-low carbon fueling experience."

The timing of the opening of the new state-of-the-art station coincides with the introduction of Cummins X15N, a 15-liter natural gas engine that is currently being used by Walmart, Knight Swift, UPS and other heavy-duty truck fleets. The multi-million dollar station which sits on five acres is located at 5 Schoolhouse Road in Carney's Point, NJ, has two fast-fill dispenser lanes for easy in-and-out fueling of RNG, and turns the south New Jersey area into a hub for clean, sustainable fueling.

Clean Energy currently has a significant customer base in the Philadelphia/South New Jersey area, fueling fleets such as South Jersey Gas, Atlantic City Jitney Association, Wally Park at Philadelphia International Airport, Waste Management, and the refuse operation of the City of Philadelphia.

Clean Energy is also investing in the production of RNG at dairy farms. Agriculture accounts for nearly 10 percent of U.S. greenhouse gas (GHG) emissions and the transportation sector accounts for another 28%, according to the EPA. Capturing methane from farm waste lowers these emissions. RNG transportation fuel produced by that methane significantly lowers GHG emissions on a lifecycle basis when compared to diesel. This allows RNG to be one of the only transportation fuels to receive a negative carbon-intensity score by the California Air Resources Board based on the reduction of emissions at the source and at the vehicle.

About Clean Energy

Clean Energy Fuels Corp. is the country's largest provider of the cleanest fuel for the transportation market. Our mission is to decarbonize transportation through the development and delivery of [renewable natural gas](#) (RNG), a sustainable fuel derived by capturing methane from organic waste. Clean Energy allows thousands of vehicles, from airport shuttles to city buses to waste and heavy-duty trucks, to reduce their amount of climate-harming greenhouse gas. We operate a vast [network](#) of fueling stations across the U.S. and Canada as well as RNG production facilities at dairy farms.
